

Job Title:	Embedded C Software Engineer
Ref:	SYR04
Location:	Norwich
Package:	£30,000 – £35,000 + Excellent Benefits
Industry:	IT

Embedded C Software Engineer

Based in Norwich

Salary: £30,000 – £35,000 + Excellent Benefits

The Role:

As the Embedded C Software Engineer you will be tasked with writing low level real-time code and drivers. Working within a growing team, you will be responsible for the maintenance and new code development for the company's existing products. Additionally, you will be required to write and maintain code in C for low level drivers and interrupt handlers. There is the opportunity to take the lead in developing new sensor-based products.

The Candidate:

The ideal candidate for the Embedded C Software Engineer role will be experienced in designing and developing embedded system software using C. You will have experience working with embedded Linux or a commercial RTOS (eg. QNX).

You will have some experience with library stacks and be familiar with TCP/ IP networking and desirably MQTT telemetry. Experience with Texas Instrument MSP430, JAVA, M2M Modules and off-air time-standard transmissions would be desirable. A relevant degree would also be seen as an advantage. The ideal candidate for the Embedded C Software Engineer role will demonstrate a keen willingness to learn and the ability to work on your own initiative and within a team.

The company are willing to consider applications from Interim or Contract candidates as well as permanent basis applications.

The Company:

Our Client is one of the world's leading developers of pipeline monitoring technology. The company offer multi-award winning solutions that help water companies manage pipeline networks more effectively and improve maintenance and durability as well as helping its clients reduce water losses and the associated costs.

The Package:

As the Embedded C Software Engineer you will receive a basic salary of £30,000- £35,000. Your benefits will include discretionary bonus scheme and share options. The successful candidate will receive 25 days annual leave.

This really is a great opportunity for an accomplished and experience Embedded C Software Engineer to join a dynamic market-leading company. To apply for role, please submit your CV and a covering letter quoting reference SYR04.
