

TrunkMinder Technology Added to the ECA Water Technology List

UK Businesses purchasing TrunkMinder will benefit from significant tax advantages

Leading pipeline technology company Syrinix, based in Norwich, has secured the inclusion of its leading “TrunkMinder” product on the Enhanced Capital Allowances Water Technology List.

UK businesses purchasing TrunkMinder units will consequently be able to benefit from 100% first year capital allowances on their expenditure.

Syrinix Chief Executive James Dunning explained,

“TrunkMinder being added to the ECA Water Technology List is another positive step for Syrinix in both its own development and in enhancing the benefits for our UK customers in deploying TrunkMinder units along their trunk mains.”
