

QUALITY POLICY STATEMENT

Syrinix provides innovative, leading-edge technology solutions for those seeking to measure flow in pipelines and associated anomalies such as leaks.

The company operates within an ISO 9001 registered Quality Management System (QMS) framework that monitors, guides and informs the operation of the business. This information is then applied to help drive continuous improvement through all of the key processes of the business and the QMS. The organisation operates within regulated industry sector and seeks to comply with all appropriate regulatory and legislative requirements.

Through the efficient deployment and investment in the people within the organisation, allied to the technical capabilities the company aims to both satisfy the expectations and needs of the customers in a timely and cost effective manner, whilst also returning a fair return for stakeholders in the business
